Program

Are you looking to make your teaching more engaging?

Gain a deeper understanding of science topics taught between years 7 and 10 by hearing from experts!

Attend lectures presented by La Trobe University scientists who will discuss aspects of their research and connect it to relevant Scientific Understanding as well as Science Inquiry strands from the Victorian Curriculum. As a bonus the scientists will also demonstrate a practical activity that supports students' understanding of the topic.

The practical activity has been carefully designed so that you can perform it in schools without the requirement of any specialised equipment.

Date	Scientist	Field
9th August (week 3)	Dr David Wilson	Computational Chemistry
23rd August (week 5)	Dr Lakshmi Wijeyewickrema	Biochemistry
6th September (week 7)	Dr Connie Darmanin	Structural Biology
20th September (week 9)	Dr Monika Fekete	Coffee Chemistry
11th October (week 11)	Dr Brian Smith	Computational Chemistry
